

June 29, 2022

Dear, hiring manager

Please accept the enclosed resume as an expression of my interest in a software-engineer: front end position at your company.

As you will note, my enclosed resume shows that I have completed my Bachelors of Science degree in Middle Education and am certified. Furthermore, I am currently in Georgia Tech's full stack development bootcamp and will receive certification during the fall months. My teaching experience(s) at Lamar County Middle School and McDonough Middle School have prepared me well. The experiences included lesson development, assertive discipline techniques, student tutoring, and student performance evaluations. I am looking to reroute my career track after I decided my current role no longer fits my interests and goals. I have an itch to not only build websites but to also tailor the look of them. I am confident that I can meet the requirements of any demanding position and contribute in a positive manner to your company and its objectives.

I would appreciate the opportunity for a personal interview at your convenience. You may contact me at my email address and telephone number listed on my resume or by email at [baileigh@outlook.com](mailto:baileigh@outlook.com) . If you desire further information at this time, I will gladly respond on request.

Thank you for your time and attention. I look forward to hearing from you in the near future!

Sincerely,

*Baileigh Brown*
